“Humans in the Loop: An MIT-Fraunhofer IPA Collaboration on Collaborative Robots and Digitization”

Amy Glasmeier

Massachusetts Institute of Technology

Glasmeier is a professor of economic geography and regional planning at MIT's Department of Urban Studies and Planning, and head of LRISA (Lab on Regional Innovation and Spatial Analysis). Her research focuses on economic opportunities for communities and individuals through the investigation of the role of geographic access and the effect of locational accident on human development.

Simon Schumacher Fraunhofer IPA

Schumacher is project manager for the Fraunhofer Institute for Manufacturing Engineering and Automation's award-winning Future Work Lab. He is also a visiting researcher and Ph.D. at MIT's Industrial Performance Center with the “Work of the Future” task force.
